

Good day Worthy Knights, In this part 74, the Chi and Rho Stars Chart

(Wikipedia)

We have seen in the early parts of these mini-lectures that the Vision of Constantine the great could have been either a Pillar of Light (Part 35) or a representation of the Chi and the Ro formed by the stars visible on the evening of October 27, 312 C.E.

As it is possible to recreate the positions of the various stars involved in this Vision, you will find hereunder such a reconstructed Star Chart done by Hans A. Pohlsander:

Michael DiMaio Jr., Jörn Zeuge and Natalia Zotov Byzantion Vol. 58, No. 2 (1988), pp. 333-360
